

Aidan the Wonder Kid Who Could Not Be Stopped

A Food Allergy Story

Aidan is a super hero with very special powers indeed. With his trusty dog Rocco at his side, there's nothing he can't do. But something is making Aidan sick. And when Aidan gets sick, he is very, very droopy. Will his grownups ever figure out what's stealing his super powers? And how can he find his boundless energy once again? Stay tuned to find out!

Background: Best selling author and health coach Colleen Brunetti knows there's a lot to handling a kid with special dietary needs. One of the biggest challenges is supporting kids as they feel "different" when they have to eat a certain way, and educating friends and family on how to feed the child safely.

This book sets out to empower kids to take control of their own health, encourages peer acceptance, and offer support to families. Told through the story of a brightly illustrated and whimsical set of characters (done by the very talented Dan Carsten), join Aidan as he flips and soars his way to victory over food allergies.

The Ask: *We are actively seeking sponsorship to help get this book into the hands of as many children as possible.*

Funds will be used to pay for professional illustration and design, as well as book giveaways to community organizations.

Please consider a donation today and help Wonder Kids everywhere soar.

Sponsorship Levels

Flip - at the \$100 level: Listing on the Wonder Kid webpage, single autographed copy of the book for your office or place of business.
